

Tech Pak Information Advantage

The Tech Pak datacenter leverages industry-standard virtualization solutions to consolidate your complex environments. Together, these technologies allow you to host multiple Windows, Linux, or UNIX applications and servers on a single platform, delivering greater IT resource utilization and enhanced flexibility. With the Tech Pak, customers realize significant information advantages:

- Reduced IT costs, risk, and complexity
- Consolidation of critical services
- Higher utilization rates for critical systems
- Improved disaster-recover capabilities
- Higher user service levels
- Secure, redundant operating environment
- Small physical heat and power footprint
- Easier to use and manage
- Minimal migration requirements

SECURETEK
GROUP INC.

SecureTek Group, an expert on server consolidation and virtualization, provides clients reliable datacenter virtualization capabilities that are unique from any other competitor. By integrating today's leading virtualization software with our optimized enhancements, SecureTek helps you employ robust, easy-to-use, reliable and interoperable data management architectures for a fraction of what you are paying today!

Education & Training Solutions

The Tech Pak's virtual architectures innovatively support all training environments:

- Synchronizes an entire training environment vs. independent computer installations
- Reduces application re-imaging time (from hours to minutes)
- Maximizes server and workstation resources for networked educational classrooms
- Allows instructors to view and assist student progress from any workstation
- Minimizes total cost of training

Tactical Command & Control Solutions

Today's battle command platforms demand speed, agility, and IT compatibility. SecureTek's virtual solution reduces IT 'stove pipes' by allowing users to access several applications from a single workstation. Tech Pak's simplified structure improves battle command support to the warfighter, allowing soldiers to direct their focus on the mission rather than IT administration.

Business Solutions

Virtualization opens the door to business continuity, allowing various applications to run natively, and side by side on the same physical machine. With Tech Pak's business applications, businesses can optimize their resources and cost:

- Reduces total cost of ownership
- Allows the user to run several applications on a single server
- Reduces the number of servers without impacting performance
- Increases overall server utilization through tighter integration
- Leverages e-mail, directory, and sign-on services with secure backup capabilities
